Continuation of Substance of Interview including description of the general nature of what was discussed: Messages were exchanged between the examiner & Mr. Schmidt, but he was going out of the country on Friday, so Mr. Cremen resolved some informational problems, but any changes to claims needed to wait for Mr. Schmidt. It was noted that the cited support in the remarks for the 9/02/04 amendment did not match that of what appears to be the original specification in the scanned file. The PTO file copy appears to be slightly more compressed than applicants', such that support for the chalk limitation is found on p. 21, lines 5-10. With respect to claims 4-6 & 13-15, it was noted that "interpolated" in lines 2, was nonidiomatic phrasing, but would appear to be consistent with --input--. The Examiner noted that claims needed method limitations therein rephrased to necessitate device structure. .
